AMR ESSAM

Full-Stack Developer | Cybersecurity Enthusiast

Kafr El Dawar, Egypt | amrt6509@gmail.com | github.com/DEVVOLTX | amressam.is-a.dev

PROFESSIONAL SUMMARY

Full-stack and game developer who builds web applications with JavaScript, PHP and MySQL and 2D games with Godot, with a growing focus on cybersecurity (IBM SkillsBuild Cybersecurity Fundamentals, Cisco Networking Basics). Has shipped 6 projects including an AI gesture-controlled game with MediaPipe, a commercial storefront and a full-stack booking system with an admin panel, and also does graphic design (logos and automotive posters).

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML/CSS, GDScript, PHP
Databases: MySQL
Game Development: Godot Engine 4.6, 2D Platformer Design, Multiplayer Game Design
AI Interaction: MediaPipe Hands, Hand Tracking, Gesture Recognition, Privacy-First ML
Cybersecurity: Penetration Testing, Nmap, Burp Suite, Metasploit
Tools: Git, Linux, Kali Linux
Design: Logo Design, Automotive Posters, Client Projects

PROJECTS

HAND-CONTROLLED PLATFORMER - AI Game / Hand Tracking | 2026

- Built a browser-based platformer controlled entirely by hand gestures using MediaPipe Hands (HandLandmarker).
- Controls: move hand left/right to run (distance = speed), close fist to jump.
- Features: 5 levels, local Top 5 leaderboard (localStorage), smart draggable camera with front/rear camera switch, auto-pause to save battery.
- Added full touch support: left joystick + right jump button for tablets and HP Envy x360.
- Added HP camera shutter fix: detects if the camera shutter is closed and shows the hint "Press Fn+F12".
- Privacy-first: all hand tracking runs locally in the browser, no video is uploaded anywhere.
- Technologies: MediaPipe Hands, JavaScript, Canvas API, Touch API | Play: amressam.is-a.dev/play/hand-platformer/
- GitHub: github.com/DEVVOLTX/Hand-Controlled-Platformer

SALAH STORE - Gaming Top-Up Storefront | 2026

- Built an Arabic-first dark UI storefront for Free Fire, eFootball and more, with instant delivery, a live status indicator, an animated ticker and direct WhatsApp ordering.
- Technologies: HTML, CSS, JavaScript | Link: devvoltx.github.io/TR_SALAH_Gaming_Site_v2

AGE CALCULATOR - Arabic Web Tool | 2026

- Built a responsive Arabic age calculator with Gregorian and Hijri dates, a live birthday countdown, a pet-to-human age converter, a date-difference tool and dark and light themes.
- Technologies: HTML, CSS, vanilla JavaScript | Link: devvoltx.github.io/Age-Calculator-v1

CAR-WASH BOOKING - Full-Stack Web Application | 2024

- Built a full-stack reservation system for managing bookings and staff, with authentication, slot availability and a full admin panel.
- Technologies: PHP, JavaScript, MySQL, HTML/CSS

ANDERMAGIC - 2D Platformer Game | 2024

- Designed all mechanics, levels and artwork solo for a challenging 2D platformer built for precision and skill. Published on GitHub.
- Technologies: Godot 4.6, GDScript

HIDE AND SINK - Real-Time Multiplayer Game | 2024

- Co-developed with a partner a real-time multiplayer game of strategy and deception where players outwit each other with misdirection and timing. Live on Itch.io.

- Technologies: Multiplayer, Game Design

EDUCATION

Salah Salem High School
General Secondary Education | 2026 - 2028
