06 HAND-CONTROLLED PLATFORMER — 2026 AI Game / Hand Tracking

A platformer you play with your bare hand.

- Built a browser-based platformer controlled entirely by hand gestures using MediaPipe Hands (HandLandmarker).
- Controls: move hand left/right to run (distance = speed), close fist to jump.
- Features: 5 levels, local Top 5 leaderboard (localStorage), smart draggable camera with front/rear camera switch, auto-pause to save battery.
- Added full touch support: left joystick + right jump button for tablets and HP Envy x360.
- Added HP camera shutter fix: detects if the camera shutter is closed and shows the hint "Press Fn+F12".
- Privacy-first: all hand tracking runs locally in the browser, no video is uploaded anywhere.

01 ANDERMAGIC — 2024 Game Dev

A challenging 2D platformer built for precision and skill.

Designed all mechanics, levels, and artwork solo using Godot 4.6 and GDScript. Published on GitHub.

GODOT 4.6 · GDSCRIPT · 2D PLATFORMER · SOLO DEV

02 HIDE AND SINK — 2024 Game Dev

A real-time multiplayer game of strategy and deception.

Co-developed with a partner. Players outwit each other using misdirection and timing. Live on Itch.io.

MULTIPLAYER · CO-DEV · GAME DESIGN · ITCH.IO

03 CAR-WASH BOOKING — 2024 Full-Stack Web

A full-stack reservation system for managing bookings and staff.

Built with PHP, JavaScript, and MySQL. Handles authentication, slot availability, and full admin panel.

PHP · JAVASCRIPT · MYSQL · HTML/CSS

04 **SALAH STORE** 2026 Web / Storefront

A gaming top-up storefront with instant delivery.

Free Fire, eFootball and more. Arabic-first dark UI with a live status indicator, animated ticker, and direct WhatsApp ordering.

HTML/CSS · JAVASCRIPT · ARABIC UI · GAMING
